PROFESSIONAL PROFILE

Final-year Bachelor of Computing student at Belgium Campus iTversity with hands-on experience developing full-stack software solutions. Skilled in C#, Java, ASP.NET Core, React, TypeScript, SQL and Docker through academic and personal projects. Selected for an international software engineering collaboration with UCLL (Belgium). Passionate about building reliable software, solving complex problems and continuously learning new technologies.

TECHNICAL SKILLS

Languages	C#, Java, Python, SQL, JavaScript, TypeScript, HTML, CSS
Frontend	React, Next.js, HTML5, CSS3
Backend	ASP.NET Core, REST APIs
Databases	SQL Server, PostgreSQL, Supabase
Tools	Git, GitHub, Docker, Visual Studio, VS Code, IntelliJ IDEA, NetBeans
Concepts	OOP, Agile, Machine Learning, Database Design, Software Engineering

PROJECTS

Green Blanket Water Quality Platform

- Served as one of two primary contributors, working mainly on backend development for a collaborative water-quality and environmental monitoring platform.
- Designed and implemented RESTful APIs using ASP.NET Core.
- Designed relational database structures and integrated an AI-powered chatbot.
- Collaborated with the development team using Git and Docker.

Growveld Farming and Business Simulator

- Built a first-person farming and business simulator prototype in Unity 6 and C#.
- Implemented player interaction, equipment placement, hotbar controls and a business-management interface.
- Added object selling, manual save and load, contextual controls and an end-to-end playable loop.

Cleaning Inventory System

- Contributed to a Java Swing desktop application using Apache Derby for relational data storage.
- Implemented material and supplier CRUD, search, input validation and low-stock highlighting.
- Set up the project and GitHub repository and collaborated on role-based inventory workflows.

PROJECTS CONTINUED

Diabetes Risk Segmentation & Decision Support

- Contributed to a team machine-learning system using Decision Tree, Random Forest and XGBoost classifiers.
- Applied K-Means clustering and SHAP analysis to segment patients and explain lifestyle risk factors.
- Supported a Docker-deployed Plotly Dash application for interactive, real-time risk predictions.

EDUCATION

Bachelor of Computing | Belgium Campus iTversity

Expected Graduation: 2027

- Selected for an international third-year collaboration project with UCLL, Belgium.
- Relevant areas: Software Engineering, Machine Learning, Database Development, Web Programming, Project Management and Software Analysis & Design.

Cyber Security Institute (CCS100) | 2022

- Completed a six-month practical cyber security programme developed with CPUT and F'SATI.

PROFESSIONAL EXPERIENCE

Sales Consultant - Cellucity | Jun 2022 - Aug 2022

- Advised customers on mobile devices, contracts and upgrades.
- Resolved technical issues and verified customer documentation.
- Maintained accurate records while delivering excellent customer service.

Trainer - Body20 Brooklyn | Sep 2022 - Dec 2023

- Coached clients during EMS training sessions.
- Managed memberships, bookings and administrative tasks.
- Developed strong communication, teamwork and sales skills.

ACHIEVEMENTS

- Selected for an international software engineering project with UCLL (Belgium).
- Completed Cyber Security Institute CCS100 programme.
