OVERVIEW

I completed my Grade 12 in 2021 and have a strong interest in Information Technology. I am particularly drawn to researching topics that interest me and believe it is essential to continuously expand my knowledge and remain up to date with the latest technological developments. Staying informed enables me to provide accurate information and well-considered solutions when assisting clients or contributing to projects.

I am highly committed to delivering my best in every task or challenge assigned to me. Even when faced with unfamiliar work, I am willing to conduct research and acquire new skills to ensure successful completion. I approach responsibilities with a strong work ethic, adaptability, and a willingness to learn. In any professional environment, I am prepared to start at an entry level and work my way up as I gain experience and develop my skills. I am motivated to achieve my long-term goals and to demonstrate my value as a dedicated and reliable employee. I place high importance on effective communication and teamwork and actively contribute to team efforts to support organisational success.

I am seeking to pursue a career in software engineering, as it aligns closely with my academic background and personal interests. My goal is to secure an internship position within an organisation where I can further develop my skills and gain practical industry experience.
